LORD Corporation

Vibration Controls for Fixed and Rotary Wing Aircraft

Background

LORD Corporation designs, manufactures and tests a wide variety of vibration controls for the Aerospace market. Their products range from main and tail rotor of the Blackhawk Helicopter to floor board isolators in commercial aircraft. Their customers range from the US Military and large OEMs (Boeing, Bell Helicopter and Sikorsky) to distributors and other large aviation operators.

LORD Corporation has had a Dayton manufacturing facility for over 25 years. Their capabilities include CNC Machining and Rubber to Metal Bonding operations. LORD is a diversified technology company with a long history of developing breakthrough adhesive, coating and motion management technologies that significantly improve the performance of their customers' products.

LORD originated in Erie, Pennsylvania more than 85 years ago and remains a privately held company today. LORD is a worldwide leader in adhesives and coatings, vibration and motion control, and magnetically responsive technologies.
